About ACES

ACES is an innovative out-of-school time program that brings math and social-emotional learning to life for Minnesota students. Since 1994, our hands-on STEM curriculum, individual mentorship, and unique experiential learning opportunities have helped thousands of middle schoolers develop crucial academic and life skills – all through the exciting lens of sports! In partnership with Minnesota's professional and collegiate sports teams, ACES is tackling the academic opportunity gap and preparing students to succeed in school, career, and community.

About the Associate Board

The ACES Associate Board is a volunteer group of young professionals committed to advancing ACES's mission to reduce the academic opportunity gap and prepare students to thrive. The Associate Board works to broaden ACES's base of support, leads a series of movement-building events including *Tacos & Trivia*, and builds a bench of future leaders.
